THEME

This 2020, the Society's focus is on developing a clear vision for the actuary amid the seismic changes going on around us. The current job description of an actuary is being challenged by Artificial Intelligence, Machine Learning and other forms of automation. In order to survive these threats, the actuary must acquire the agility and the willingness to adapt and grow with technology and embrace new ways of assessing risk and designing solutions to reduce the financial impact of risk. This is the inspiration for the theme "**ASP 2020: The Future-Proof Actuary**".
